

Goldwin Tracon Pvt. Ltd.

Presents

The Mule

THE WORLD'S LARGEST SCRAP LIFTING MAGNET

**THE MULE IS NOT MEANT FOR SMALL FURNACES AND OVERHEAD
CRANES OF LESS THAN 15 MT CAPACITIES**

Goldwin Tracon Pvt. Ltd.

The “*mule*” is specially designed and manufactured to cater for handling large quantities of scrap. The increasing sizes of arc and induction furnaces necessitate large requirements of handling scrap, especially unloading from the incoming vehicles as well as feeding the furnace platform or charging baskets.

The “*mule*” is specially designed in an elliptical shape to enable entry into restricted spaces, and at the same time carry away high loads.

Technical Details :

Size mm	Weight Kgs	Power KW	DC Volts	Current Amps
3000 x 1800	9500	53.5/38.5	260/220	206/175

Lifting Capacity : Kgs

Shredded Scrap	Sponge Iron
2600	3000
