

India's Largest Extreme Hot Duty Magnet Manufacturer

Rectangular Billet Lifting Magnet of size 2100 mm X 900 mm

Our unique Rectangular Billet Lifting Magnet of size 2100 mm x 900 mm which is specially designed to lift billets cold and hot. This single magnet can be used instead of two numbers of Rectangular Lifting Magnets with Spreader Beam as has been the practice.

Our Rectangular Lifting Magnet can lift 8 Nos. billets of size 100 sq. mm of length up to 12 meters. This magnet has been sold all over the world and in India to many customers and it has been proven that a single 2100 mm x 900 mm lifts successfully 12 meter long billets for the entire working shift in steel plants over the continuous casting skid banks.

This magnet has been the preferred choice of crane operators as the time spent in centering the 2 magnets on spreader beam as well as aligning the magnets with the axis of the billets is very cumbersome. Moreover, in this the working face of both the magnets should be in the same level or the billets get unstuck with small jerks of crane rail joints.

For units producing 100 MT. or more of billets per day this 2100mm.x900mm. is an absolute must.
